

# 300 VDI MOUNTING

For Use with Compressed Air Only

## Features:

- Rugged Nylon Construction
- Double Sided Gauge
- Color Coded For Easy Reading
- Extends Element Life By Changing Only When Necessary

## Applications:

- Remote Filter Monitor
- Ideal For Particulate Laden Systems
- Able To Mount To Filters Already In The Field

The 300VDI kit can be factory installed or mounted in the field. It is designed to fit our 380 series of housings, and may be attached to other proprietary brands.

The Visual Differential Indicator is designated as "VDI" and is designed as a colored gauge with set points from 0 to 5 PSIG in the green range, 6 to 9 in the yellow range, and 10 to 14 PSIG in the red range.

This "VDI" kit may be installed in the field by the end-user by simply turning off your line pressure, venting the filter, and removing two 1/8" plugs in the head and threading the 300VDI into the 1/8" taps.
